### SUMMARY

Highly motivated Software Engineering undergraduate (Semester 5) with hands-on experience in Full-Stack Web Development and Automation Workflows. Skilled in building scalable applications using MERN stacks and solving problems with Data Structures & Algorithms. Passionate about clean code and applying theoretical knowledge to practical projects. Seeking a Software/Web Development Internship to gain industry experience and grow as a professional developer.

### TECHNICAL SKILLS

- HTML5
- CSS3
- React.js
- JavaScript (ES6 / ES2015)
- Tailwind CSS, Bootstrap
- Java
- Java(Swing and Awt)
- Node.js
- Express.js
- RESTful API Development
- MVC Architecture
- Git & GitHub (Version Control)
- Python
- Python(Numpy,Pandas,Matplotlib)
- MongoDB
- Microsoft SQL Server
- Appwrite
- n8n Workflow Automation
- Docker
- AWS(ECR and ECS)
- Scss

### EDUCATION

#### The Superior University | Bachelor of Software Engineering Sep 2024 – Oct 2028 (Expected)

- Studied core subjects including Data Structures, Object-Oriented Programming , Database Systems, and Software Engineering, building a strong foundation in software development principles.
- Solved programming problems using C++, focusing on logic building, algorithmic thinking, and efficient code implementation.

#### Superior College | Intermediate (ICS) Sep 2022 – May 2024

- Studied Computer Science, Mathematics with strong programming fundamentals.
- Learned basics of C programming and problem-solving techniques.
- Developed logical thinking and analytical skills through academic programming tasks.
- Built small console-based programs as part of coursework.

#### Liaquat Foundation High School | Matriculation (Computer Science) Mar 2020 – Apr 2022

- Studied Computer Science fundamentals, including basic programming concepts.
- Learned introductory topics of algorithms, logic building, and problem solving.
- Built a strong foundation in mathematics and computing concepts.

### CERTIFICATIONS

- **Shopify Development** – JDC Free IT City Lahore (Batch 1 | July – September 2024)
- **Introduction to SQL** – Sololearn (January 2026)
- **JavaScript ES6 (ES2015)** – MindLuster (May 2025)
- **Introduction To Packet Tracer** – Cisco (April 2026)
- **Networking Basics** – Cisco (April 2026)

### Quick-Chat Application (SERN Stack)

- Developed a real-time chat application using SQL Server, Express.js, React.js, and Node.js
- Integrated Socket.io for live messaging functionality
- Implemented user authentication and real-time message updates
- Designed scalable backend APIs and responsive frontend UI

### Full-Stack Blog Application

- Built a complete full-stack blog platform using **React.js** and **Appwrite**
- Implemented secure authentication, post creation, editing, and deletion (CRUD operations)
- Integrated role-based access control and clean UI design
- Focused on code reusability and maintainability

### Doctor Appointment Automation System

- Designed an end-to-end automated appointment booking system
- Used **n8n** to automate booking flows, WhatsApp notifications, and payment triggers
- Reduced manual intervention by automating scheduling and confirmation processes
- Demonstrated strong understanding of workflow automation and system integration

### Real-Time Collaborative Code Editor (MERN Stack / WebSocket Project)

- Built a real-time code editor using React, Monaco Editor, Yjs, and Socket.io
- Enabled live multi-user editing with instant sync and cursor tracking
- Implemented WebSocket-based collaboration with scalable architecture
- Ensured smooth, conflict-free real-time user experience

### VibeTube Backend (Node.js Project)

- Developed a scalable backend for a video-sharing platform inspired by YouTube and social media features
- Built **RESTful APIs** for user authentication, video management, comments, likes, subscriptions, and playlists
- Integrated media handling using Cloudinary for efficient image and video storage
- Designed MongoDB database schemas for optimized data storage and retrieval
- Implemented secure authentication and authorization mechanisms using **JWT**
- Focused on modular architecture, API optimization, and clean code practices

### Car Rental System (MERN / Full Stack Project)

- Developed a full-stack Car Rental Web Application enabling users to browse, book, and manage vehicle rentals
- Implemented user authentication & authorization (JWT) for secure login and access control
- Designed RESTful APIs for car listings, bookings, and user management
- Integrated database for storing vehicle data, booking history, and user details
- Built responsive frontend using React.js & Tailwind CSS for seamless user experience
- Added features like search, filtering, and booking management system
- Focused on clean architecture, scalability, and optimized backend performance

### HireCraft AI Interview Preparation & Resume Optimization Platform (Full Stack MERN + Generative AI)

- Developed an AI-powered platform that analyzes resumes against job descriptions and provides personalized interview preparation reports.
- Implemented ATS resume optimization, job match scoring, and skill gap analysis to improve candidate readiness.
- Built AI-driven technical and behavioral interview question generation with suggested answers.
- Developed PDF resume generation and secure user authentication using JWT.
- Designed and implemented a responsive full-stack application using React.js, Node.js, Express.js, and MongoDB.

### Route Finder Application

- Implemented a route-finding system using **graph** data structures
- Applied shortest path algorithms to determine optimal routes
- Strengthened understanding of graph traversal and optimization techniques

### Hazel Blue Airline Reservation System (C++)

- Developed a console-based Airline Reservation System using **C++** and **OOP**.
- Features: Admin & Passenger roles, flight management, ticket booking, booking history, file-based data storage, and CLI-based UI.

### SOFT SKILLS

- Strong problem-solving and analytical thinking
- Ability to learn new technologies quickly
- Good communication and teamwork skills
- Time management and task prioritization

### ADDITIONAL INFORMATION

- Strong analytical thinking and problem-solving abilities.
- Quick learner, adaptable to new technologies and tools.
- Experience in team collaboration using Git and Agile workflows.
- Passionate about automation, backend systems, and scalable architectures.
- Committed to writing clean, maintainable, and efficient code.
- Enthusiastic about contributing to real-world projects and continuous learning.

***CODE IS THE TOOL, BUT LOGIC IS THE MASTER.***
